REGISTRATION ERROR?
HERE IS WHAT IT MEANS

Linking Error
Each section has a five digit Course Reference Number (CRN), whether it is a lecture, discussion or lab. You must load each CRN that is required for a course at the same time.

- Example: ANTH 003 requires a lecture and discussion to register. When registering, you should input CRN 10455 (lecture) and either CRN 10456 or 10457 (discussion) at the same time. The lecture and discussion are “linked” together, which makes it impossible to register for only one.

- Time conflicts or a closed section can cause linking errors.

Time Conflict Error
The error is occurring because you have tried to register for two courses scheduled at the same time or the final exam time for one course is the same time of another. Remember, a time conflict may be with a lecture, discussion, lab or final exam.

- You should try to register for another open section of the same course, complete a Time Conflict Override Form, or register for a different course. You should contact your academic advisor if you have any questions.

Closed Section
The error is occurring because the lecture, discussion or lab you are trying to register for is at maximum capacity and there are no seats open for that section.

- You should try to register for another open section of the same course or register for a different course.

Prerequisite Error
The error is occurring because the course you are trying to register for requires you to complete another course prior to registering in the one you received the error.

- Example: Chemistry 002, General Chemistry, has prerequisite of Chemistry 001 or passing score on the Chemistry Placement Exam or score of three or better on AP Chemistry Exam.

- To learn the prerequisites for a specific course you should look in the catalog or through the portal by clicking on the CRN of the course and then click on the highlighted course title. You should contact your academic advisor if you need assistance.

Instructor Consent/Signature Required
If you are trying to register for a course that requires the instructor’s consent, you need to contact the instructor for that course or your academic advisor. Once you receive the instructor’s approval, an academic advisor can place an override for the instructor approval allowing you to register. Instructor’s consent will need to be obtained on the Add/Drop Form.

- You can find the instructor’s e-mail by going through the portal, click on the CRN of the course, and then click on the envelop icon next to name of the instructor. You should contact your academic advisor if you any questions.

Co-requisite Error
The error is occurring because the course you are trying to register for requires that you to register for another course during the same semester. For example, BIO 151L must be taken during the same semester as BIO 151.

- When registering, you should input all the CRN’s required for both courses at the same time.

Class Restriction
The error is occurring because the course requires a different class standing (Freshman, Sophomore, Junior, Senior, Graduate) than your current class standing.

- You should choose another course or contact your advisor for assistance.

Level Restriction
The error is occurring because the course requires a different level (Undergraduate, Graduate) than your current level. You should choose another course.
